Meiden observes 50th anniversary of establishing a subsidiary in Malaysia

Meidensha Corporation (Meiden) has observed the 50th anniversary of establishing a local subsidiary in Malaysia. MEIDEN MALAYSIA SDN. BHD., Meiden's current consolidated subsidiary based in the Malaysian capital of Kuala Lumpur, held a ceremony to mark the anniversary on September 15, 2023.

Meiden Malaysia was established in 2010. Its core businesses are electrical engineering work and those related to engineering, procurement and construction (EPC). It also handles the sales of the Meiden Group's products and systems, in addition to providing services and maintenance.

Meiden's operations in Malaysia date back to Meiden Malaysia's predecessor, MEIDEN ELECTRIC ENGINEERING SDN. BHD, which was established in July 1973. In the years that followed, the company's business opportunities expanded amid Malaysia's social and economic progress.

Meiden Malaysia has now evolved into an engineering firm with a team of 65 specialists who handle a wide range of projects, including those commissioned by the private sector and those involving public infrastructure.

Malaysia is the second country where a local subsidiary of the Meiden Group observed its 50th anniversary of founding, following the one in Thailand.

Meiden Malaysia is committed to further expanding its business by harnessing the technological power and quality management capability that it has nurtured in delivering and installing equipment as a springboard of value creation, while contributing to the social and industrial development of Malaysia.

At the commemorative ceremony

■ Meiden Malaysia

Established in 2010, the company handles electrical engineering work, EPC-related businesses, the sales of products and systems of the Meiden Group, and service and maintenance operations.
