

Meidensha Corporation has supplied Solar Inverters to 21MW Solar Park in Bulgaria

-22March, 2012-

SDN Company Ltd, the Korean Top Solar System Integrator, has built 21 MW RES Solar Park in Bulgaria and started operation in February 2012. 84 units of 250kW MEIDEN PV Inverters were installed to the Solar Park. The installed MEIDEN PV Inverters are “SP100-Series”, which comply with IEC standard and has high efficiency (Max. efficiency: 97% <Built-in transformer type>). 20 units of same type Solar Inverters were installed in Ostar Kamak 5MW Solar Park in Bulgaria by SDN Company last summer. Meidensha Corporation keeps on working with this Renewable Energy Sector and supplying our Reliable Products to our Customers.

RES Solar Park in Bulgaria

MEIDEN PV Inverters“SP100-Series”

Meidensha Corporation was founded in 1897, MEIDEN has delivered a variety of its electric products related to power generation, transformation and distribution of electric power and its supervision system to all over the world.

The power conversion system which MEIDEN has developed from 1926 has been evolving with technologies are adopted Inverter for electric vehicle, NAS battery system which is for large scale power storage and voltage compensator and so on.

SDN Company Ltd. was established in March 1994 as Seoul Marine Co. Ltd and changed its name in April 2010. SDN Company has for at least three consecutive years No 1 market share in Photovoltaic systems in Korea. The company enjoys more than 36% market share in PV systems in Korea with over 200 completed PV projects to date.

Comments from SDN Company Ltd.

Since 2005, SDN has used Meiden's inverters. Because of its good quality and performance, SDN has chosen it also for overseas projects. On top of its reliability, Meiden's active support has been an important point for SDN to build successful PV plants. From several years of partnership with Meiden, SDN's staffs firmly believe that Meiden's inverter will be chosen for the future projects.
