

The MSL's 40th Anniversary Ceremony and Opening Ceremony for its Ceramic Membrane Units Factory and the R&D Center

A gala dinner was held at Shangri-La Hotel in Singapore on October 15, 2015 to commemorate the 40th anniversary of Meiden Singapore Pte. Ltd. (MSL), a Meiden Group company in Singapore. In this ceremony, many guests were invited from various Singapore governmental organizations such as Ministry of Trade and Industry, Ministry of Education, and Economic Development Board (EDB), Land Transport Authority (LTA), Public Utilities Board (PUB), Agency for Science, Technology And Research (A*STAR), Singapore Power Ltd., etc. Besides these guests, there were also MSL's customers at home and abroad, related suppliers and service providers in Singapore, representatives from Meiden Group firms in Asia or Middle East. Total about 380 people attended the ceremony.

In the afternoon of the same day, there was an opening ceremony for MSL's Ceramic Membrane Units Factory and the R&D Center which are located in the MSL's premise. For this ceremony, there were representatives from the EDB and other Singapore's water-processing related government offices and agencies (PUB, etc.).

The Meiden Group recognizes Singapore as a regional headquarters for our power Transmission and Distribution (T&D) and water processing businesses in Southeast Asian and Middle East regions. We established the production and after-sales service system in Singapore. And this time, we established the R&D Center there.

MSL has been engaged in the supply of power transformers and switchgears. Further, drawing on our experiences and expertise in Japan on the water processing technologies, we are now developing the ceramic flatsheet membrane-based Membrane Bioreactor (MBR) systems (ceramic MBR) business. MSL joined various verification research projects with PUB like ceramic MBRs for Jurong Water Reclamation Plant in Singapore. MSL also supplied ceramic MBRs to treat and recycle used water at Changi Water Reclamation Plant in Singapore.

By opening the Ceramic Membrane Units Factory and the R&D Center, Meiden Group would like to help realize the Global Hydro Hub

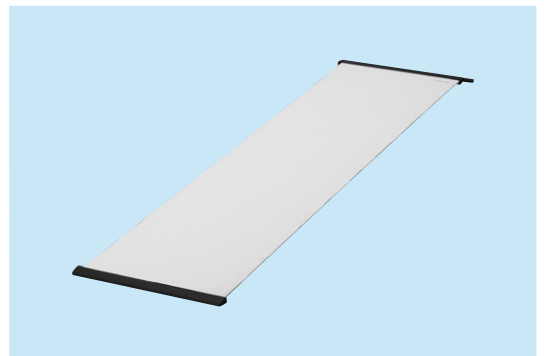

Plan by Singapore Government and work hard to spread the application of ceramic MBR to ASEAN and Middle East Regions.
